### ORGANIZING YOUR BATHROOM STORAGE

A well organized bathroom can save us a lot of time and hassle while cleaning or getting ready. Here are some easy tips for organizing your bathroom.

- Add baskets to linen closets and under the sink. Categorize and label the baskets for hair products, lotions and even towels.
- If you have extra counter space and don't mind storing stuff out in the open, use apothecary jars or mason jars for cotton swabs and cotton balls.
- Make use of your space above the toilet by adding a cabinet or open shelving.
- Add trays to drawer space to prevent clutter. A utensil tray is a great way to separate toothbrushes.
- Make use of the inside of your cabinet and linen closet doors by adding hooks or baskets. A metal mesh basket is great for storing warm hair tools.
