NEW YEAR—BETTER WATER

Is being healthier and happier part of your new years resolution? These products can help you keep that resolution.

Reverse Osmosis Systems—Improve your drinking water by adding a PS-5 drinking water system. The PS-5 system will give you bottled-water quality water right from the tap in your home while helping protect the environment. The system reduces the amount of reject water sent down the drain by 50%. A reverse osmosis system will help eliminate taste, odor, dirt, salts, chlorine, lead and more.

Whole House Filter—The Dakotah series whole house water filter systems will give you better quality water not only for drinking but also for bathing and washing dishes and clothes. This series is made in Minnesota specifically for our water here in North Dakota and comes with or without a water softener option. By sending in a sample of your water, you can get the best option for your home to remove contaminants like minerals, chlorine, metals.

Instant Hot Water Dispenser—The InSinkErator company offers hot water dispensers that give you instant 200° water. This is perfect for making tea, hot cocoa, hot cereals or even preparing sauces & mixes. Utilizing a 2/3 gallon stainless steel tank located beneath your sink and a stylish faucet that fits in a standard sink opening, it is a great addition to any kitchen.

Want more information on how these water products can make you happier & healthier in 2015? Contact **Lori or Julie** with **Northern Plains Plumbing & Heating** at (701) 222-2155 today!

BATHROOM UPDATE: TUB/SHOWER OPTIONS

If you are looking to update your tub and shower, think about replacing them with one of the following options. A new tub and shower can make your bathroom look fresh, new and clean.

A popular and economic option is to install a remodeler unit from Sterling (shown on the left). These tub/shower combinations are made of a Vikrell® material and come in four sections to easily move into your home. All Sterling tub/shower combinations use an interlocking system which needs little to no caulking. They are easy to clean and maintain and have ample storage. Options include sizes ranging from 60" x 30" to 60" x 42", colors of white, biscuit & almond and whirlpool options in many units.

You can dress up your bathroom by installing a tub with tile walls. This opens up the design possibilities as well as making a more custom design to your bathroom. Tub sizes can range from 60" x 30" to 72" x 42" and come in both fiberglass & acrylic materials. These tubs have options for whirlpool systems and air systems or they can be soaker tubs only. Another great option is the ability to tile the front of the tub or leave it with a built-in front skirt (as shown on right). Decorative tile, recessed shelving or clear glass doors will add sophistication and style to the room.

Julie and Lori with Bath and Kitchen Consulting & Design can help you update your tub/shower in 2015!

Air Knight REME Cleaner, Fresher Indoor Air in 24 Hours

A Photocatalytic Oxidation (PCO) Technology

The Air Knight REME is designed to help eliminate indoor air quality problems by reducing odors, air pollutants, VOCs (chemical odors, smoke, mold, bacteria and viruses). The Air Knight REME is easily mounted into the home's air conditioning and heating system air ducts where many indoor air quality problems start. When the HVAC system is in operation the Air Knight REME creates an Advanced Oxidation Process consisting of ionized hydro-peroxides, super oxide ions and hydroxide ions, all of which are friendly oxidizers that react back to oxygen and hydrogen after the oxidation of the pollutant.

REME Technology enhance filtration by charging the particulate in the air forcing dust, dander and allergens to cling together making them easier to capture.

Benefits of Air Knight REME Technology
 With a REME Generator Advanced Oxidation System, micro-organisms can be reduced by over 99%. Gases, VOCs, odors and particulate (dust) can also be reduced significantly. Charged Advanced Oxidation Plasma will be carried throughout the conditioned space for a continuous purification process and a thorough cleaning of mold and mites.

Size of Room	1000 sq. ft.	1500 sq. ft.	2000 sq. ft.	2500 sq. ft.	3000 sq. ft.
Price	\$499.00	\$599.00	\$699.00	\$799.00	\$899.00

Charged particles stick together making pet dander and allergens easier to remove.
